My heart is like to break to night, 'Tis like to rend in twein, For loving one that loves me not, And heedeth not its pain. Nor is this love the transient flame Of feeling's meteor glare; But like the fire on holy shrines, For ever burning there.

Unkindled and unfanned, it fell A little spark at first; I knew not when it woke to life, And into being burst. I only know it spread and ran, Subduing earthly pride; Till feelings chastened fountain lay,

Refreshed and purified. Yes, by a spell I could not break, I chased the beacon sign; Nor cared I that another soul Should give its life to mine-Till day by day the name I loved Was trembling on my lips; And in my heart no other light

His glory could eclipse. And daily too 'twas all my prayer, That God would keep and bless, And fill the soul transfused in mine, With perfect happiness. I know not how I dared to blend That spirit with my own,

Or ask our Father's hand to keep The idle on his throne. I dare not tell how much I loved,

Nor could I if I dare, Before I asked one answering word, In pity to my prayer. But ol.! those words my burning lips For ever shall conceal, For cold suspicions macked my love

It shamed me to reveal. O, God! I know 'tis thy rebuke, But cannot fear spart Chains that enslave my will, and bind This idol to my heart. Be still that heart, thy worship wild Is cast on empty air; The all-consuming love of years

Is buried in despair.

April 1846, Stephen Donohoe sued James tion of ejectment, to recover a tract of A wide, for sale by the piece, by J. D. PERRY, Glasgow, Coy in the Chariton circuit court, in an aclived. Donohoe claimed the land by purchase, at the land sales for taxes, made by the Sheriff of Chariton county, in September 1844, for the taxes of the year 1842. Patent Concave Beater Churn. W E call the attention of the public to the ar-ticle heading this advertisement, and invite the enterprising and curious to call and witness its operation. All advertisement in relation to this invention, to the hundreds who have seen t tested, is supercrogation.
First. This Churn will produce butter, gather-

ing it in a mass, from sweet milk, in five minues, and from cream prepared, as families usually prepare it, in three to five minutes.

Second. The utility of this invention is appa rent, as better butter can be produced from swee milk, or cream, than cream soured in the usual way; and by means of this Churn, a little girl or or one or two hours, and sometimes half a day. Third. By simply turning a thumb-screw,

whole inside dasher is taken out, leaving nothing ut the butter and milk in the plain wooden box. Fourth. It is the cheapest Churn ever invented, as the simplicity of its construction (though emoodying a great philosophical principle.) makes it but little to manufacture it.

Fifth. It is a common sense Churn, as all wil admit who will examine it. We are now offering the complete monopoly of this staple article in States and counties, which

will insure certain and large profits and a speedy return of investments. COLVER & MYERS, 32, Vine st., up stairs St. Louis, October 5, 1848 .-- 31tf.
